## DETAILED ACTION

### *Election/Restrictions*

Applicant's election without traverse of invention of Group II (clms. 4-6, 8-10) in Paper No. 10 is acknowledged.

Claims 1-3 and 7 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, Group I, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 10.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9 and 10 are is rejected under 35 U.S.C. 103(a) as being unpatentable over Pilao (5,178,339). Pilao disclose a refiner filling comprising blades (27) and spacers (30), the blade being cut into blade segments and being defined by tapered shoulders so that each blade segment has a tapered end and a spacer placed between adjacent blades defining a groove between the blades (figs. 3-6). Pilao does not disclose notch(s), however it would have been obvious to one having ordinary skill in the art to construct the blade of any shape/notches. The specific selection of a notched shape requires only routine skill in the art and is a matter of design choice.

***Allowable Subject Matter***

Claims 4-6 and 8 are allowed.
